"We have discovered TSplus only few months ago and we have already created many remote clients. We are very satisfied with your solution. Keep on staying on top of future changes in operating systems and browsers as you have."

SB TECHNIQUE SA (Switzerland)

"TSplus is very good, it works even "out of the box" (in our case in a virtual machine W8.1, running under KVM on a Linux Host). It prevents any legal problems with MS (or others)'s CLUF! I wish you the best success..."

Darell Nash

"I am a new customer and I have to say I have been pleased by your product. The remote client users have worked great! And the printing worked better than I thought it would. Shortly, I will be deploying the web access version of our utility billing software to potentially 10 000 users."

"I have a client who wants to distribute his apps to multiple sites throughout the country. I showed him a demo of his app using TSplus and explained that he could keep total control of the application by running all the sites on a local server and giving them access via the web or just with the remote clients."

Pat,

"I haven't had to request the technical support: for 2 years that I am using TSplus, I never had any problem with your software. Please keep doing what you are doing."

"I just had my first trial with TSplus and it exceeds my expectations. Having used the equivalent MS before I was surprised at how good this product was for the price. Also, the support was faster and more personal."
